Dear Dr. Trisno,

You have been invited to review a manuscript for International Journal of Construction Management.

I would be grateful if you would review a paper entitled "Managing Complex Construction Project: Experience in Indonesia's Cement Projects" for this journal.

This is the abstract:

This paper aims to guide new investors on how to deal with complicated investment procedures in Indonesia. The paper also has designed to contribute to the theoretical and practical level, to help innovate the dynamic environment in managing complex project management during implementation. The methods presented are based on the case studies combined with the analytical hierarchy process (AHP) based on the construction of cement projects from 2010 to 2018. All have been structured by exploratory research methodology then enriched by the descriptive analysis. An argument-based analysis communicates findings. To conduct complicated heavy projects such as cement projects, there are five big stages of management: the preparation unit, procurement, ground-breaking and construction division, commissioning, and finally, closing ceremony. This research first dedicated for the cement projects, but it can be adapted to other projects with several adjustments. These findings help investors to set up earlier and anticipate uncertain strategies when they would like to invest in Indonesia. It is proven that these empirical findings will have reactions or responses from several parties involved but the expectation is to improve and innovate procedures as contribution to help change society's habits and attitudes.

If you would like to review this paper, please click this link: [Agree to Review](#) *If you do not wish to review this paper, please click this link: [Decline to Review](#) *If the above links do not work, please go to <https://www.editorialmanager.com/tjcm/>. Your User Name is rudytr@ft.untar.ac.id and your password can be set at this link: [click here to reset your password](#).

The manuscript reference is TJCM-2021-1075.

If possible, I would appreciate receiving your review in 14 days. You may submit your comments online at the above URL. There you will find spaces for confidential comments to the editor, comments for the author and a report form to be completed.

We are collaborating with Publons to give you the recognition you deserve for your peer review contributions. On Publons you can effortlessly track, verify and showcase your review work and expertise without compromising anonymity.
