

CREATING SUSTAINABLE AND PROSPEROUS CITIES

TUESDAY, NOVEMBER 17, 2020 | 2-4 PM (JAKARTA TIME) | 8 - 10 AM ITALY TIME (UTC + 1) | 2 - 4 AM USA TIME (UTC - 6)

Urbanization provides opportunities for residents to gain access to urban services and various economic, business, and political opportunities that cannot be obtained in rural areas. Failure and delay in understanding this phenomenon will impact on the unanticipated emergence of negative externalities such as emergence of slum settlements and the growth of informal economy. To prepare for city development, it is necessary to prepare these cities to develop in a positive direction in economic welfare, availability of infrastructure, quality settlements and environmental preservation which therefore need a common agenda for all urban stakeholders, such as the government, private sector, and the citizens.
