Scope

Journal of Cultural Analysis and Social Change is an international, interdisciplinary peer-reviewed and open access journal. It aims to publish excellent cultural analysis from a range of perspectives. It welcomes innovative and original conceptual and empirical research drawn from a number of disciplines and subdisciplines including sociology, social theory, cultural studies, historical sociology and gender studies. The journal engages with key issues and topics such as:

- cultural production and consumption
- taste and aesthetics
- value and values
- migration, culture and identity
- cultural globalization
- cultural reproduction and appropriation
- social class and inequality
- protest culture and resistance
- cultural hierarchies and power
- arts and popular culture
- literature and music
- celebrity culture and fashion
- 'race', ethnicity and culture
- marginality and cultural inequalities
- space, place and culture
- gender and sexuality
- everyday life and cultural experience
- food, culture and society
- science and culture
- consumer society and the environment
- cultural politics and 'culture wars'

J

John

3 days ago

Hi, may I know the impact if a Scopus Indexed journal changes its publisher and the newly appointed publisher is different from the Scopus webpage? Also, please check the publisher of the Journal of Cultural Analysis and Social Change which is acknowledged by Scopus. I was told that its new publisher is BRIGHTEREDGE PRESS RESOURCES. Is the new publisher i.e. BRIGHTEREDGE PRESS RESOURCES acknowledged by the Scopus?

reply

**Melania Ortiz - SCImago Team**

3 days ago

Dear John,

Thank you very much for your comment.

We suggest you contact the Scopus support team here:

https://service.elsevier.com/app/answers/detail/a_id/14883/kw/scimago/supporthub/scopus/

Best Regards, SCImago Team

J

Jack

7 days ago

By the end of 2025, I noticed that the publications on this journal's website and the indexing in Scopus were different. The Scopus link only contained four articles, while the journal's website contained hundreds of articles that were not indexed by Scopus. Does this mean there is a problem with this journal?

reply

**Melania Ortiz - SCImago Team**

3 days ago

Dear Jack,

Thank you very much for your comment.

We suggest you contact the Scopus support team here:

https://service.elsevier.com/app/answers/detail/a_id/14883/kw/scimago/supporthub/scopus/

Best Regards, SCImago Team

Hakim

2 weeks ago

Dear Safasur,
having read all the comments on this matter, I become more and more doubtful about the validity of this journal as Scopus indexed journal. So, I haven't paid the AFC yet up to now.

reply

Melania Ortiz - SCImago Team

2 weeks ago

Dear Hakim,

Thank you for your comment.

We suggest you consult the Scopus database directly to see the current index status as SJR is a static image of Scopus, which is changing every day.

The Scopus' update list can also be consulted here:

<https://www.elsevier.com/solutions/scopus/how-scopus-works/content>

For further information, please contact the Scopus support team here:

https://service.elsevier.com/app/answers/detail/a_id/14883/kw/scimago/supporthub/scopus/

Best Regards, SCImago Team

Semuel

2 weeks ago

Could you please check again the coverage, because i see the coverage in Scopus and Scimago is different

reply

Melania Ortiz - SCImago Team

2 weeks ago

Dear Samuel,

Thank you for contacting us.

SCImago is updated only once a year (latest update March 2025), after receiving the Scopus'annual update.

For this reason, we always recommend to consult the Scopus database directly to see the current index status of a journal.

In addition, you can check the updated Scopus journals list released regularly by Elsevier by checking the link below:

<https://www.elsevier.com/solutions/scopus/how-scopus-works/content>

Best Regards, SCImago Team

I have a research title Of Total Quality Management And Knowledge Management System A Study From An Organizational Perspective.

My question is whether this topic falls under cultural studies or management accounting. I'd like to use this article as a primary requirement for a promotion application. Reviewers typically ask about the journal's relevance to the published article.

reply

Melania Ortiz - SCImago Team

2 weeks ago

Dear David,

Thank you for contacting us.

We are sorry to tell you that SCImago Journal & Country Rank is not a journal. SJR is a portal with scientometric indicators of journals indexed in Elsevier/Scopus.

We suggest you visit the journal's homepage (See submission/author guidelines) or contact the journal's editorial staff , so they could inform you more deeply.

Best Regards, SCImago Team

Inty khan

3 weeks ago

Thanks for your message. I know Scimago is not a journal, but it is indexing body which should look into the concerns authors are sharing. I contacted the first member of the editorial board who was not even aware that her name was in the panel. She hardly knows about the review process. The journal website was bought 3 months ago, and the buyer is publishing for money. After 2-3 months both Scopus and Scimago will put a hold but by that time many authors will be looted in the name of Scopus and Scimago.

I don't know why indexing bodies are not reacting. People have started doubting if these indexing bodies are also part of money making process.

Thanks for understanding !

Dear Inty,

Thank you for your comment.

Our data source is Scopus, and SCImago doesn't participate in the journal's selection. SCImago has no authority to include or exclude SJR journals. We just show the data provided in the latest update by Scopus. Please contact the

Scopus Support team regarding this matter here:

https://service.elsevier.com/app/answers/detail/a_id/14883/kw/scimago/supporthub/scopus/

Best Regards, SCImago Team

Inty Khan

3 weeks ago

Though the journal is indexed in Scopus database, supported by SCImago, the review process is doubtful as there is no mention in the website of the journal except 'it is a peer reviewed journal'. But, where is the peer review flow-chart, minimum time limit. As per the standard of the Scopus, peer review process should be transparent.

Generally, where a journal starts accepting papers extremely fast, people and critics starts becoming negative. And, one day, they get a news that the journal is under investigation which is first step towards removal of the journal from the Scopus database.

In fact my message is not to get INFO regarding Scopus indexing (Q.2), but acceptance of every paper.

Will an appropriate authority satisfy the worries of the authors who pay huge fee, and sweet day and night to finish a paper, and eventually all goes in vain.

Thanking in advance!

Inty Khan

Thank you for your insight, Professor Inty
Many authors have been deceived, paying with huge fees (APC), but ultimately their articles are not indexed in Scopus because those journal have been discontinued in the Scopus platform

This journal recently changed ownership from Lectito to another publisher. According to a former member of its editorial board, it was a bona fide journal prior to the sale.

While all past issues published under Lectito are indexed in Scopus, the question remains: what will happen to the papers accepted by the new publisher?

reply

Dear,

In this scimagojr.com this journal is coverage for 2019 - 2024

but in scopus.com is coverage 2019 - 2025

Why did it happen? Which one is true?

reply

Melanie Ortiz

1 month ago

Dear Pariang,

Thank you for your comment.

We suggest you consult the Scopus database directly. Keep in mind that the SJR is a static image (the update is made one time per year) of a database (Scopus) which is changing every day.

The Scopus' update list can also be consulted here:

<https://www.elsevier.com/solutions/scopus/how-scopus-works/content>

I've received a notification of acceptance of my manuscript from this journal, and I should pay USD 1000 the AFC. They send to me the bank transfer details, but the SWIFT code is not correct.

Does anyone have already paid this value and have the article published?
Someone could give me a valuable information about the status of this journal.
Is it indexed by Scopus Q2, or a predatory?

This journal accepts paper only within three days of submission. How is it even possible? Does it truly maintain any peer review policy? Nowadays, it seems to serve more as a source of income than as a platform for promoting original research. If this continues, it risks being delisted from Scopus in the near future.

I too received the same notification. May i kindly ask have u paid the invoice?

D Dr. Nida Khan

2 months ago

I too received the notification in 4 days. Really surprised. I checked the journal is authentic . I even check the list posted on scopus and they are active. The only problem is the bank acct details that have been sent belongs to the following company.

- Account Name: BRIGHTEREDGE PRESS RESOURCES
- Account Number: 5121479****
- Company Address: M2-17-01 Tower 2, Level 17, 8trium Bandar Sri Damansara, 52200 Kuala Lumpur, Malaysia
- Contact Number: 60162757490
- Email: editor@jccasc.com
- Bank Branch: Maybank - Taman Sri Serdang
- Branch Address: 231-233, Branch Lots, Jalan 18/23, Taman Sri Serdang, 43300 Seri Kembangan, Selangor, Malaysia
- Swift Code: MBBEMYKLXXX

Now This raises a red flag. Let me know if someone paid and got the approval ?

ABSTRACT

The SRI-KEHATI index serves as a reference for investors interested in companies committed to Sustainable and Responsible Investment (SRI) and Environmental, Social, and Governance (KEHATI) principles. This research aims to analyze the influence of women on the Board of Directors and the age of the board, with a focus on how these factors are moderated by the Audit Committee and Independent Commissioners in relation to Corporate Social Responsibility Disclosure (CSR) from 2018 to 2022. The study examined a sample of 14 companies and employed Moderated Regression Analysis for the analysis. The findings reveal that the presence of women on the board and the age of the board positively influence CSR. However, only the age of the board is effectively moderated by the Audit Committee. The implication of these results is that Audit Committees and Independent Commissioners should enhance their understanding of the significance of CSR information. This understanding can help to reduce information asymmetries between management and stakeholders, ultimately contributing to sustainability.

Keywords: Sustainable and Responsible Investment, Environmental, Social and Governance, Woman on Board Directors, Board Age, Audit Committee, Independent Commissioners.

INTRODUCTION

The Paris Agreement is a legally binding international treaty focused on climate change. Adopted by 196 parties during the UN Climate Change Conference (COP21) in Paris on December 12, 2015, its primary objective is to limit the average global temperature increase to well below 2°C above pre-industrial levels, and to pursue efforts to limit the temperature increase to 1.5°C. In recent years, world leaders have recognized the urgent need to reduce global warming to 1.5°C by the end of this century, as rising air temperatures are a significant consequence of climate change.

Climate change can occur naturally, but human activity considerably exacerbates the situation. While certain human behaviors that interact with nature may not have a significant impact, activities that exploit natural resources for profit—such as excessive and unplanned extraction—are major contributors to climate change.

Indonesia has committed to addressing temperature increases due to climate change by reducing its greenhouse gas (GHG) emissions. The government aims to decrease GHG emissions by 29% by 2030. In 2022, Indonesia's GHG emissions totaled 1,220 million tons of CO₂ equivalent, with significant contributions from various sectors: the energy industry emitted 715.95 million tons, industrial processes and product use contributed 59.15 million tons, agriculture accounted for 89.20 million tons, forestry and peat fires added 221.57 million tons, and waste produced another 221.57 million tons. This represents a 6.9% increase compared to

2021. This situation presents both a phenomenon and a challenge for Indonesia as it strives to meet its 2030 commitments. Reducing GHG emissions requires more than just regulatory measures; it necessitates a dedicated approach and effective management from businesses and governance systems.

Corporate governance is a mechanism through which controlling managers oversee and ensure the development of reasonable profits and benefits for stakeholders (E-Vahdati et al., 2018). In this framework, the company collaborates with all interdependent stakeholders. Corporate governance plays a crucial role and is vital to consider due to its impact on company performance (Castrillón, 2021). Good governance can be understood as having a long-term vision and strategic goals aligned with those of the stakeholders (Broman & Robert, 2017). This shared vision emphasizes sustainability, encompassing both the company's business practices and the community's social and environmental aspects. Therefore, a commitment to sustainability within corporate governance is essential for fostering a consistent culture throughout the organization (E-Vahdati et al., 2018).

The primary purpose of corporate governance is to maintain a balance between the company's individual and collective goals, including economic objectives (Claessens, 2006). To achieve this, companies often engage in Corporate Social Responsibility (CSR) activities guided by their policies. The effectiveness of these CSR policies greatly depends on the corporate governance standards in place (Fahad & Rahman, 2020). Consequently, CSR activities are closely integrated with the company's governance structure throughout its operations.

One aspect of corporate responsibility within CSR is the Corporate Social Responsibility Disclosure (CSRD), which is included in the annual report. The effectiveness of corporate governance mechanisms correlates with the quality of CSRD (Fahad & Rahman, 2020). To ensure accountability in implementing governance related to CSRD, it is important to have independent governance bodies, such as the Audit Committee (AC), Independent Board (IB), external auditors, and others, monitor the decisions made by the board of directors regarding the CSRD information provided to stakeholders, including investors in the capital market.

In this century, the role of women in companies has evolved beyond that of staff or managers; they have demonstrated their capacity to lead organizations both independently and as part of boards of directors or boards of commissioners. The representation of women on boards of directors has become increasingly common in Indonesia. With their intellectual abilities and ownership stakes, women have become integral members of these boards. However, their representation still lags behind that of men. This situation highlights the ongoing issue of gender diversity in corporate management, including within publicly traded companies. The presence of women on boards can significantly influence the governance structure of a company. Board diversity acts as a governance mechanism that legitimizes the business world and creates opportunities for sustainability (Tremblay et al., 2016).

The inclusion of women on boards can positively impact qualitative tasks such as corporate social responsibility (CSR) (Lim & Chung, 2021) because women tend to be more socially oriented. This orientation can lead to more effective decision-making regarding CSR (Boulouta, 2013), as women generally prioritize CSR issues (Ben-Amar et al., 2021). Additionally, women on boards typically adopt a participative leadership style, fostering effective open communication that addresses stakeholder interests and CSR-related matters more effectively (Bear et al., 2010). This tendency is rooted in the communal values into which women are often socialized, resulting in increased transparency in CSR disclosures (CSRD) (Paoloni et al., 2023). Research indicates that larger boards of directors tend to enhance CSR initiatives (Nwude & Nwude, 2021), particularly in the banking industry. CSRD refers to a series of documents aimed at informing all stakeholders about CSR activities (García-Sánchez & Martínez-Ferrero, 2018), thereby addressing stakeholder concerns.

Studies by Garde et al. (2017), Guerrero-Villegas et al. (2028), Masoud and Vij (2021), and Paoloni et al. (2023) demonstrate that women's presence on boards positively influences CSRD. However, research by Abang'a & Taurigana (2024) and Dongol & Shrestha (2024) indicates a significant negative impact of women's boards on CSRD, which is supported by findings from Cucari et al. (2018), Fahad and Rahman (2020), and other studies (Garde Sánchez et al., 2020; Kirana & Prasetyo, 2021; Nguyen et al., 2021) that show negative and insignificant results.

The composition of board members in terms of gender and age has been a topic of interest. It is becoming increasingly clear that, rather than being dependent on age, the ability and knowledge of an individual determine their suitability for serving on a board, whether as a commissioner or a director. This makes age diversity a vital aspect, as it ensures a variety of knowledge, social insights, and work experiences, which can enhance the decision-making process and lead to more comprehensive outcomes (Dwekat et al., 2022; Cucari et al., 2018).

Younger boards tend to be more receptive to technology and modern ideas, allowing them to be flexible in planning and improving societal contributions (Dwekat et al., 2022). Conversely, older boards bring a wealth of

knowledge and wisdom to business decision-making (Handajani et al., 2014), often preferring traditional strategies and being more risk-averse (Dongol & Shrestha, 2024).

Previous research indicates that younger boards have a positive influence on Corporate Social Responsibility Disclosure (CSR), as shown by studies conducted by Handajani et al. (2014), Ismail & Latiff (2019), and Al-Zaqeba (2023). However, this finding contradicts the research of Khan et al. (2019) and Dongol & Shrestha (2024). Given the ongoing discussion about greenhouse gas emissions and the differing research results regarding the influence of female board members and the age of board members on CSR, further investigation is warranted. This study will focus on companies listed in the SRI-KEHATI index. The SRI-KEHATI index comprises 25 issuers listed on the Indonesia Stock Exchange that are committed to the principles of Sustainable and Responsible Investment (SRI) as well as Environmental, Social, and Governance (ESG) criteria, and it is managed by the Indonesian Biodiversity Foundation (KEHATI).

Moreover, the roles of Independent Board Members (IB) and the Audit Committee as moderating factors between the presence of women on the board and the age of board members on CSR represent a novel aspect of this research. This study will also incorporate Institutional Ownership and Managerial Ownership as control variables to minimize ownership bias on the board. The findings of this research are expected to provide valuable insights into enhancing CSR and boosting investor confidence in companies that prioritize sustainability.

LITERATURE REVIEW

Agency Theory

This theory is crucial for business operations aimed at increasing company value. It emphasizes the importance of separating ownership and management functions within companies, which helps clarify the social responsibility of businesses (Jensen and Meckling, 1976). To ensure this separation, a contract is necessary between the owner and an agent, who is responsible for carrying out activities on behalf of the owner (Jensen and Meckling, 1976).

However, this division can lead to conflicts of interest, as the owner and the agent may have different goals. These conflicts can create information asymmetry, where agents possess more information about company operations than owners do. To mitigate these conflicts of interest and reduce information asymmetry, effective corporate governance mechanisms are essential (Nidumolu, 2018).

One effective governance solution is the involvement of an external independent party to monitor and supervise the agents in managing the company. This independent oversight can be provided by an Independent Commissioner and an Audit Committee. These two independent entities are expected to help bridge the information gap between fund owners and all stakeholders.

Corporate Social Responsibility Disclosure (CSR)

According to ISO 26000, Corporate Social Responsibility (CSR) is defined as actions that are transparent and adhere to moral and ethical standards related to sustainable economic growth. This includes considerations for public health and welfare, taking into account the expectations of stakeholders and complying with legal regulations at both domestic and global levels. CSR reflects a business's responsibility for the consequences arising from its decisions.

CSR encourages companies to voluntarily integrate social and environmental concerns into their business operations and interactions with stakeholders (Dahlsrud, 2008). It represents a company's accountability for the effects of its decisions and activities on society and the environment through behavior that is transparent, ethical, and aligned with sustainable development and community welfare while considering stakeholder expectations (Hafez, 2016).

To uphold accountability for CSR activities, companies are required to report on the outcomes of these efforts through a Sustainability Report or in the annual Disclosure Report (CSR). The CSR provides information about a company's non-financial expenditures related to environmental and social activities, including aspects like commodities, employees, employment, energy, the environment, and community engagement (Dawd and Charfeddine, 2019). It also includes information on environmental and social initiatives undertaken by the company to the community in the annual report (Abdulkadir and Alifiah, 2020).

Hypothesis

In reducing information asymmetry, agency theory highlights the role of the board of directors as an efficient agent that promotes corporate social responsibility (CSR) to align the interests of owners and stakeholders with long-term goals (Chang et al., 2015). Consequently, companies engaged in CSR activities

typically establish various committees within the board that collaborate to minimize agency conflicts (Masud et al., 2018). In addition to the collective efforts of these committees, board diversity is essential, which includes representation of women and a variety of ages among board members.

The board of directors is crucial in shaping corporate strategy, including involvement in CSR initiatives (Amadi et al., 2023). Women are often socialized to embrace communal values that reflect concern for others, selflessness, a desire for unity, and respect for the welfare of others. Their presence on the board enhances the moral legitimacy of the company through social activities (Muttakin et al., 2015) and indirectly improves information disclosure to stakeholders, including details about CSR implementation (Qa'dan & Suwaidan, 2019). Research suggests that women generally exhibit a higher level of moral awareness compared to men (Amadi et al., 2023). A greater number of women on the board tends to foster altruistic attitudes, which can lead to better social behavior (Kruger, 2010) by promoting involvement in environmental initiatives and enhancing workplace relationships (Bernardi & Threadgill, 2010). Moreover, the presence of women in the boardroom is critical as it influences the level of information disclosure (Dienes & Velte, 2019; Guerrero-Villegas et al., 2018; Masoud & Vij, 2021; Paoloni et al., 2023).

H1: Women on the Board of Directors have a positive effect on CSRD

Age diversity on the board significantly influences the decisions made regarding the company's operations, including those related to Corporate Social Responsibility (CSR) activities and compliance with the Corporate Sustainability Reporting Directive (CSRD). It is expected that age diversity will positively impact the quality of CSRD. When different generations come together, they can enhance decision-making strategies, improve risk management, and foster greater openness to technology adaptation (Nyirenda, 2010).

Older board members possess more experience (Qa'dan & Suwaidan, 2019) and have developed comprehensive practices that stem from their accumulated skills, allowing them to make informed business decisions. Consequently, older board members tend to be more valuable and preferable than their younger counterparts. Research shows that boards with older members are likely to implement governance structures and processes that are more environmentally focused (Post et al., 2011).

In Indonesia, many board members are over the age of 50, and they often foster better social policies and strategies. Older boards typically prioritize long-term sustainability by cultivating positive relationships with the community and the environment. In contrast, younger board members, who generally represent a smaller proportion of the board, tend to favor more dynamic operations and may be inclined to take greater risks.

Given these characteristics, the age composition of the board is likely to influence CSRD. This is supported by research from Handajani et al. (2014), Ismail & Latiff (2019), and Al-Zaqeba (2023). Therefore, the hypothesis formulated in this research is:

H2: Board age has a positive effect on CSRD

Large-scale audit committees possess the necessary strength, diverse competencies, and various perspectives required to ensure accurate monitoring of Corporate Social Responsibility (CSR) disclosures (Bastina & Bernawati, 2019). The primary role of the Audit Committee is to supervise the board, enhance the quality of both financial and non-financial reports, and reduce information asymmetry between stakeholders and management (Betaineh et al., 2023). Additionally, the audit committee is tasked with supporting long-term operational goals from both economic and environmental standpoints (Appuhami & Tashakor, 2017). Research indicates that a larger audit committee tends to be more effective in producing high-quality CSR disclosures (Othman et al., 2014).

However, Betaineh et al. (2023) argue that the audit committee has no significant influence on CSR disclosures. They suggest that CSR policies reflect the company's management strategy regarding CSR disclosure, and the audit committee is not directly involved in these policies. Conversely, the audit committee is more likely to issue regulations and guidelines that support the board's mission and obligations, rather than using policies and regulations to conduct social activities. This view contrasts with findings from Buallay & Al-Ajmi (2020), Musallam (2018), and Khasana et al. (2023), who present differing perspectives on the role of the audit committee in CSR disclosures.

H3: Audit Committee moderates the influence of Women on the Board of Directors on CSRD.

H4: Audit Committee moderates the effect of Board Age on CSRD

The independent board in this context refers to the independent commissioner. An independent commissioner is a representative from outside the corporation, either with or without an intermediary, who holds shares in the corporation and has no ties to a public entity, nor is a member, director, or primary owner of the public entity. They should not be involved in any transactions related to the public corporation or its industry, whether directly or through intermediaries.

Independent commissioners are individuals who are free from the interests of the owners and managers of the company. They act as representatives of stakeholders, providing oversight of company operations, which includes the implementation and reporting of Corporate Social Responsibility (CSR).

Because independent commissioners represent the interests of stakeholders, their presence is expected to influence the content of CSR disclosure (CSRSD) information. This assertion is supported by research conducted by Dwekat et al. (2020), Colakoglu et al. (2021), and Khasana et al. (2023). Additionally, independent commissioners have been shown to moderate the impact of the Women's Council on CSRSD, as noted by Swardani et al. (2021).

Given this information, the hypothesis for this research is as follows:

H5: Independent Commissioners moderate the influence of Women on the Board of Directors on CSRSD.

H6: Independent Commissioners moderate the effect of Board Age on CSRSD

RESEARCH METHOD

This research is a descriptive quantitative study that utilizes secondary data as its research object. The independent variables in this study are the Female Board and Age of board members. Institutional Ownership and Managerial Ownership serve as control variables, while Audit Committee and Independent Commissioners function as moderating variables. The dependent variable is Corporate Social Responsibility Disclosure (CSRSD). The study applies the Global Reporting Initiative (GRI) Generation IV (G4) standards for measuring CSR. Below are the measurements for the variables used:

Table 1. Operational and Measurement Variables

Variables	Measurement	Scale
Audit Committee (AC)	$AC = \Sigma \text{ number AC}$	Ratio
Commisioner Independen (CI)	$CI = \frac{\text{Number CI}}{\text{Total Board of Commisionaries}}$	Ratio
Institutional Ownership (IO)	$IO = \frac{\text{Total Shares of IO}}{\text{Total Outstanding Shares}}$	Ratio
Managerial Ownership (MO)	$MO = \frac{\text{Total Shares owned by Manager}}{\text{Total Outstanding Shares}}$	Ratio
Board Age (AB)	$AB = \text{Average aged of all board}$	Ratio
Woman on Board Directors (BW)	$BW = \frac{\text{Total Woman in Board}}{\text{Total Member Board}}$	Ratio
CSRSD	$CSRSD_{ij} = \frac{\sum X_j}{N_j}$ 1 = for CSR information according to GRI 0 = for no CSR information according to GRI	Ratio

This research adopts a capital market perspective using the SRI-KEHATI index, which stands for Sustainable and Responsible Investment - Indonesian Biodiversity. The SRI-KEHATI index was established to provide investors with information on public companies that demonstrate strong performance in supporting sustainability efforts and environmental awareness through good governance practices. Companies included in the index are assessed every six months by an independent foundation.

For this study, the sampling method used is non-probability sampling with a purposive approach. The selected companies must meet the following criteria: 1) the company must be listed on the Indonesian Stock Exchange, 2) the company must consistently be included in the index during the research period from 2018 to 2022, 3) the company must issue an annual report containing Corporate Social Responsibility Disclosure (CSRSD), and 4) the annual report must be publicly accessible. A total of 14 companies that meet these requirements were identified, resulting in 70 data samples. The data were analyzed using Moderated Regression Analysis, which was performed after the sample data passed classical assumption tests.

The classical assumption tests included normality, multicollinearity, heteroscedasticity, and autocorrelation tests. The normality test was conducted using the One-Sample Kolmogorov-Smirnov test, which revealed an asymptotic significance (2-tailed) value of 0.055, indicating that the data is normally distributed.

In the multicollinearity test, the results show that the AC variable has a tolerance value of 0.757 and a Variance Inflation Factor (VIF) value of 1.322; the IC variable has a tolerance value of 0.346 and a VIF value of 2.888; the IO variable has a tolerance value of 0.706 and a VIF value of 1.416; the MO variable has a tolerance value of 0.849 and a VIF value of 1.179; the AB variable has a tolerance value of 0.697 and a VIF value of 1.435; and the BW variable has a tolerance value of 0.335 and a VIF value of 2.982. Each variable has a tolerance value greater than 0.10 and a VIF value less than 10, indicating that there are no multicollinearity issues.

The results of the heteroscedasticity test, conducted using Spearman's Rho test, showed significance values (2-tailed) for AC at 0.730, IC at 0.989, IO at 0.752, MO at 0.199, AB at 0.949, and BW at 0.491. All significance values are greater than 0.5, indicating no evidence of heteroscedasticity for any variable.

Finally, the autocorrelation test was performed using the Durbin-Watson (D-W) test, which yielded a D-W value of 1.943. This value lies between 1.8025 and 2.1975 (dU-dW-4-dU), confirming that there is no correlation between the disturbance errors in one period and those in the previous period. With all classical assumption tests passed, we can proceed with the regression analysis and Moderated Regression Analysis.

RESULTS AND DISCUSSION

Result

The independent variable in this study accounts for 49.90% of the variance in the dependent variable, as indicated by the R-squared value obtained from the determinant test. This suggests that nearly 50% of Corporate Social Responsibility Disclosure (CSR) is influenced by the variables included in this research. Consequently, the independent variable demonstrates a strong capability to explain the variations in CSR.

Regression tests were conducted to assess the direct influence of the independent variable on the dependent variable. Below are the results of this direct influence test:

Table 2. Regression Result.

	Unstandardized Coeff.		Standardized Coeff Beta	t	Sig.
	B	Std. Error			
(Constant)	-63.701	34.669		-1.837	0.071
BW	40.918	12.727	0.390	3.215	0.002
AB	1.799	0.644	0.341	2.793	0.007
IO	0.000	0.001	-0.037	-0.330	0.743
MO	0.000	0.039	0.190	1.679	0.980

The results of the influence regression test indicate that the presence of women on the board (WB) has a significant value of 0.002 and a beta of 40.918. These findings support the hypothesis, demonstrating that WB positively influences Corporate Social Responsibility Disclosure (CSR). This aligns with the research conducted by Garde et al. (2017), Guerrero-Villegas et al. (2028), Masoud and Vij (2021), and Paoloni et al. (2023). However, it contrasts with the findings of Abang'a & Taurigana (2024) and Dongol & Shrestha (2024), as well as Cucari et al. (2018) and Fahad and Rahman (2020), which suggest that the Women's Board has a negative significant impact on CSR. Additionally, studies by Sanchez et al. (2020), Kirana & Prasetyo (2021), and Nguyen et al. (2021) have concluded that the Women's Board does not affect CSR.

Moreover, the age of board members (AB) shows a significant value of 0.007 with a beta of 1.799, indicating that AB positively affects CSR. This finding is supported by the research of Handajani et al. (2014), Ismail & Latiff (2019), and Al-Zaqeba (2023). However, it contradicts the studies conducted by Khan et al. (2019) and Dongol & Shrestha (2024).

The following presents the results of the moderation test conducted on the Audit Committee and Independent Commissioner regarding the influence of the Women's Board and the Age of Board Members.

Table 3. Moderated Regression Analysis Test Results.

	Unstandardized Coeff.		Standardized Coeff Beta	T	Sig.
	B	Stf Error			
(Constants)	48.867	37.301		1,256	0.214
WB	-21.223	37274	-0.202	-0.569	0.571

AB	0.539	0.645	0.102	0.869	0.407
IO	-0.004	0.001	-0.321	-2.805	0.007
MO	0.074	0.034	0.218	2.172	0.034
AC*WB	6.451	2.401	1.226	2.687	0.090
AC*AB	-0.068	0.024	-1.215	-2.900	0.005
IC*WB	5.816	64.518	0.044	0.090	0.928
IC*AB	0.500	0.390	0.277	1,282	0.205

Note: a. Dependent Variable: CSRD.

The results of the Moderated Regression Analysis indicate that the Audit Committee does not moderate the influence of the Women's Board on Corporate Social Responsibility Disclosure (CSRD), with a significance value of 0.090, which is greater than 0.005. This finding suggests that the presence of Independent Commissioners weakens the impact of the Women's Board on CSRD.

On the other hand, the Audit Committee does moderate the influence of Board Age on CSRD, as indicated by a significance value of 0.005. This means that the Audit Committee enhances the effect of Board Age on CSRD.

Furthermore, the role of Independent Commissioners does not moderate the influence of the Women's Board (significance of 0.928) or Board Age (significance of 0.205). This suggests that Independent Commissioners diminish the impact of both the Women's Board and Board Age on CSRD.

DISCUSSION

The study indicates that the number of women on the board of directors is relatively small; however, these women exert a direct influence on the information related to the Corporate Social Responsibility Disclosure (CSRD). When examining their educational and career backgrounds, it becomes apparent that they possess extensive qualifications. Some of them are either owners or have familial ties to the majority owner, typically the company's founder. Women generally exhibit a higher level of empathy than their male counterparts and tend to have a communal nature that reflects their concern for stakeholders. Consequently, they strive to provide more comprehensive and informative data for the CSRD.

Despite their efforts, the women's decision to enhance the quality of information presented in the CSRD does not receive adequate support from the Audit Committee. This lack of support may arise from the Audit Committee's focus on monitoring the company's financial performance and operational effectiveness, leading to insufficient attention being paid to the CSRD information for a thorough review. Similarly, support from the Independent Commissioner is lacking. Independent commissioners, who are meant to represent the interests of stakeholders, often do not pay close attention to the information provided by women on the Board of Directors regarding the CSRD. It is possible that they assume the CSRD information shared by the women is sufficient, considering it is prepared or reviewed by individuals who are more attuned to societal issues and exhibit an open communication style.

Most board members in this study are over 50 years old, with only a few approaching that age. Previous studies suggest that older board members bring valuable experience (Qa'dan & Suwaidan, 2019) and have accumulated practical skills throughout their careers. Furthermore, older board members are more inclined to make long-term decisions wisely, which can positively impact the information provided to stakeholders in the CSRD. The Audit Committee fully supports the Board regarding the CSRD information, believing it to be beneficial for the company, shareholders, and stakeholders. This belief in the wisdom and experience associated with age enhances the influence of board age on CSRD.

However, this support is not mirrored by the Independent Commissioner. Since Independent Commissioners are generally of similar age to the board members, they tend to uphold the Board's decisions, as long as these do not deviate from the General Meeting of Shareholders' directives. Consequently, the information in the CSRD does not moderate or diminish the influence of Board Age on CSRD.

The study is organized into two main sections: Results and Discussion. The Results section presents the outcomes of the data analysis and summarizes the conclusions drawn from the research findings in relation to the research objectives. The Discussion section delves into the implications of the research findings, elucidating their meanings and providing arguments that support these findings.

Additionally, the Discussion section addresses the connections between the research findings and contemporary research, identifies existing research gaps, and explores the relationship between these findings and previous studies, as well as relevant theories.

CONCLUSION

The conclusion of this research indicates that the Audit Committee and Independent Commissioners have not effectively supported the inclusion of women on the Board of Directors in providing information on Corporate Social Responsibility Disclosure (CSR/D). The Audit Committee should enhance the influence of women on the Board regarding CSR/D, as women generally possess a higher sense of empathy and social responsibility, which could lead to more effective CSR outcomes. However, their impact may be limited due to a lack of understanding in the areas of environmental and social auditing. Similarly, the Independent Commissioners' oversight does not significantly enhance the influence of women on CSR/D.

On the other hand, the role of the Audit Committee does strengthen the influence of Board Age, as it acknowledges that the decision to provide information for CSR/D is adequate. In contrast, the Independent Commissioner's perspective does not reinforce the influence of Board Age on CSR/D.

This research is limited by the lack of detailed information regarding the structure of the CSR/D creation process, which is not fully explained in the annual report. This omission prevents a clearer understanding of the research findings.

The implication of this research is that the Audit Committee must be equipped to review the results of CSR activities and their reporting. This will help minimize information asymmetry between agents, owners, and stakeholders. Additionally, Independent Commissioners play a crucial role in providing information on CSR activities to stakeholders, which supports the company's sustainability and reduces informational discrepancies.
