This study aims to find the use of sketches for capturing visual objects in investigating or describing social behavior and building analysis. This type of research is a qualitative descriptive study to develop a research method that takes data from documents *photovoice*, and *eye-observation* as a data collection method. The research uses sketches as a data source and is taken from expression images (sketches) that call or record the thoughts of the observed object. The results of the research are the development of research methods in analyzing data, especially in humanities research and architectural engineering, namely qualitative descriptive research methods with the help of sketches or eye observation. The results of this study can be used by researchers who have expertise in the
