Berkas Hingga	: BELUM KAWIN

JAKARTA SELATAN  
18-02-2020

- 1 Buka aplikasi untuk mengedit foto
- 2 Tambahkan teks yang berisi keterangan scan
- 3 Atur ukuran dan posisi teks agar menutupi informasi penting
- 4 Turunkan *opacity* atau transparansi teks agar informasi dan watermark-nya sama-sama masih bisa terbaca

# Hati-hati saat memberikan *permission* pada apps di smartphone

Pastikan permission yang diminta sesuai dengan fungsi aplikasi.

Permission yang perlu diperhatikan:

- ▶ Camera
- ▶ Contacts
- ▶ Location
- ▶ Microphone
- ▶ Phone
- ▶ SMS
- ▶ Storage

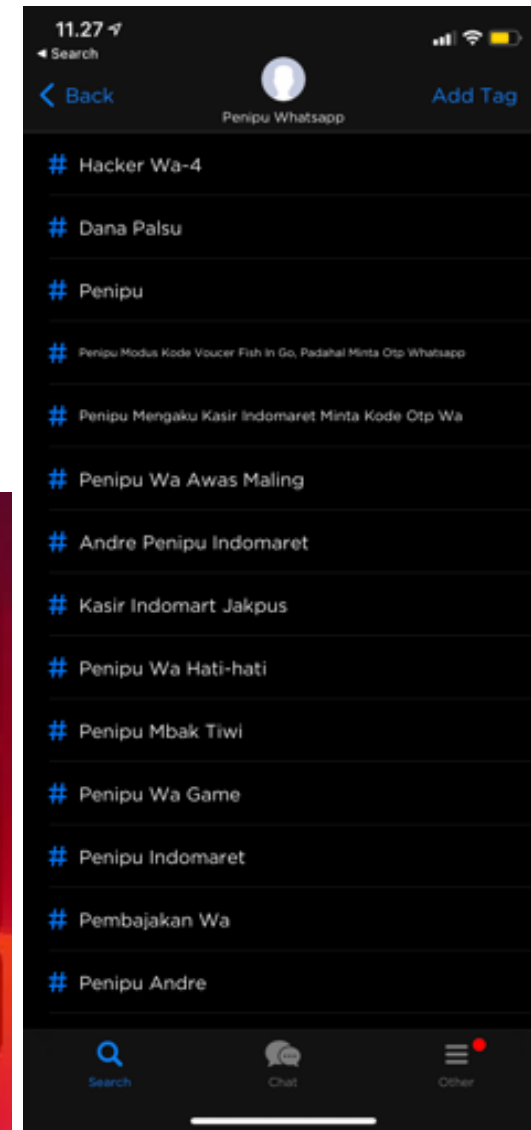

# Aplikasi GetContact

Cek nomor telepon yang menghubungi kita

Alternatif lain:

- ▶ TrueCaller

# Cek kebocoran data

Have I Been Pwned: Check if your email has been compromised in a data breach

# '--have i been pwned?

Check if your email or phone is in a data breach

Oh no — pwned!  
Pwned in 23 data breaches and found 7 pastes (subscribe to search sensitive breaches)

### 3 Steps to better security

[Start using 1Password.com](#)

- Step 1** Protect yourself using 1Password to generate and save strong passwords for each website.
- Step 2** Enable 2 factor authentication and store the codes inside your 1Password account.
- Step 3** Subscribe to notifications for any other breaches. Then just change that unique password.

Why 1Password?

[Facebook](#) [Twitter](#) [Bitcoin](#) [Donate](#)

### Breaches you were pwned in

A "breach" is an incident where data has been unintentionally exposed to the public. Using the 1Password password manager helps you ensure all your passwords are strong and unique such that a breach of one service doesn't put your other services at risk.

 **000webhost:** In approximately March 2015, the free web hosting provider 000webhost suffered a major data breach that exposed almost 15 million customer records. The data was sold and traded before 000webhost was alerted in October. The breach included names, email addresses and plain text passwords.

**Compromised data:** Email addresses, IP addresses, Names, Passwords

# Password yang kuat

- ▶ Minimum 8 karakter
- ▶ Campuran dari huruf kecil, huruf besar, dan simbol
- ▶ Hindari kata yang ada di kamus dan informasi pribadi
- ▶ Jangan ditulis di atas kertas

**Password Strength Chart** **SANDSTORM**<sup>IT</sup>  
power on

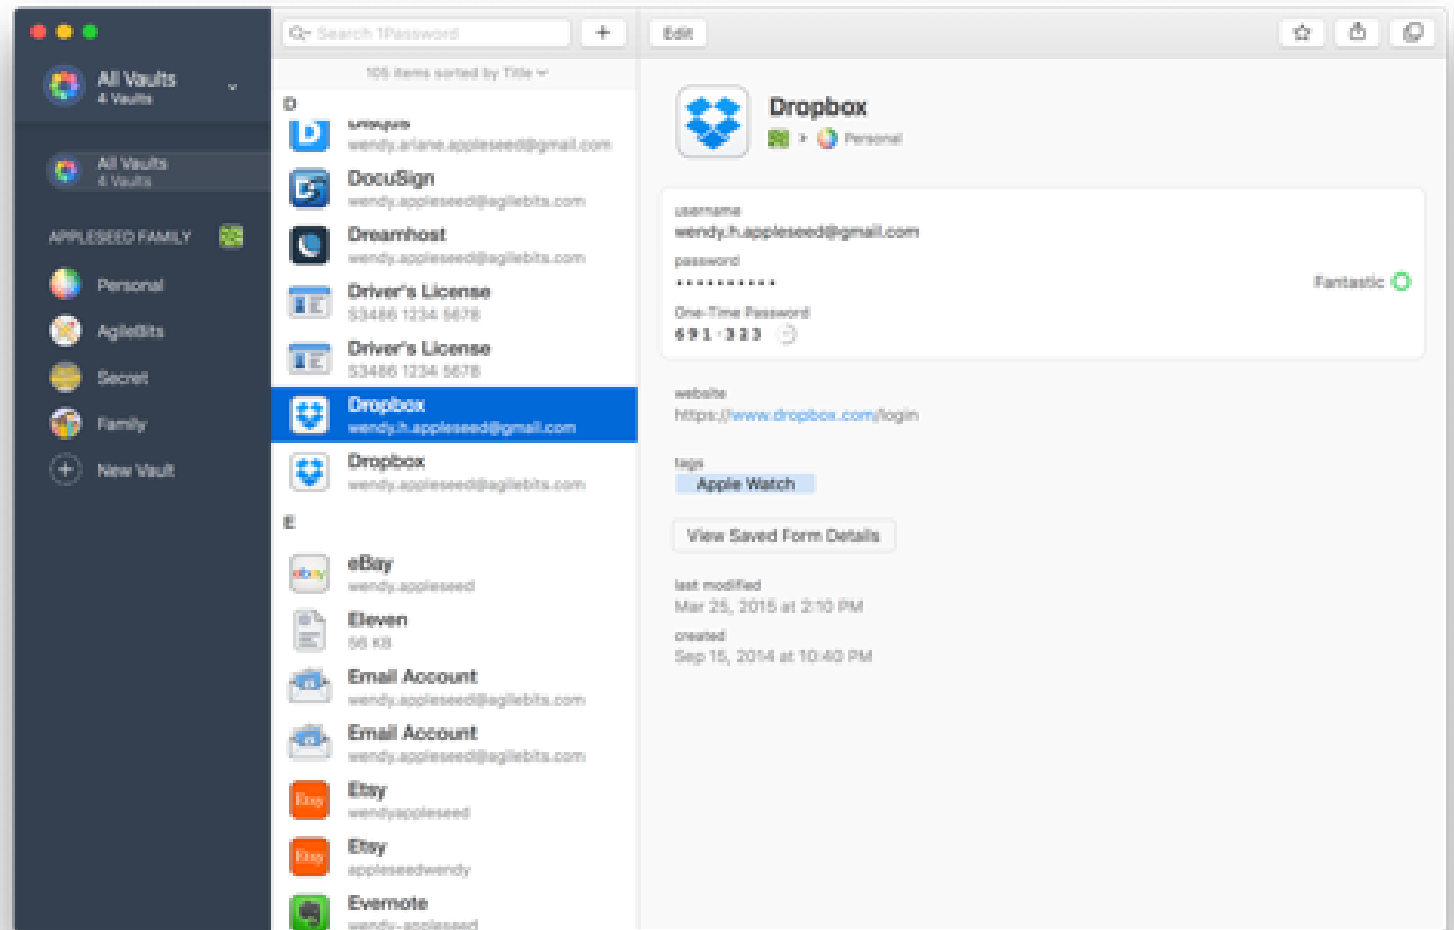

This is based on the average brute forcing (botnet) power in 2019.

<b>123456</b> <small>Top 10,000 password</small>	<b>0.20 milliseconds</b>	<b>Unsafe</b>
<b>qwerty123456</b> <small>Longer "common" password</small>	<b>13 hours</b>	<b>Unsafe</b>
<b>ITFunSom3times</b> <small>Longer password with numbers</small>	<b>48 thousand years</b>	<b>Risky</b>
<b>ITISfun\$0m3times!</b> <small>Longer password with numbers and special characters</small>	<b>13 trillion years</b>	<b>Good</b>
<b>imusingalongpasswordtoday</b> <small>Even Longer password</small>	<b>913 trillion years</b>	<b>Better</b>
<b>imu\$ingalongpa\$\$word+oday!</b> <small>Even Longer password with numbers and special characters</small>	<b>2 octillion years</b>	<b>Best</b>

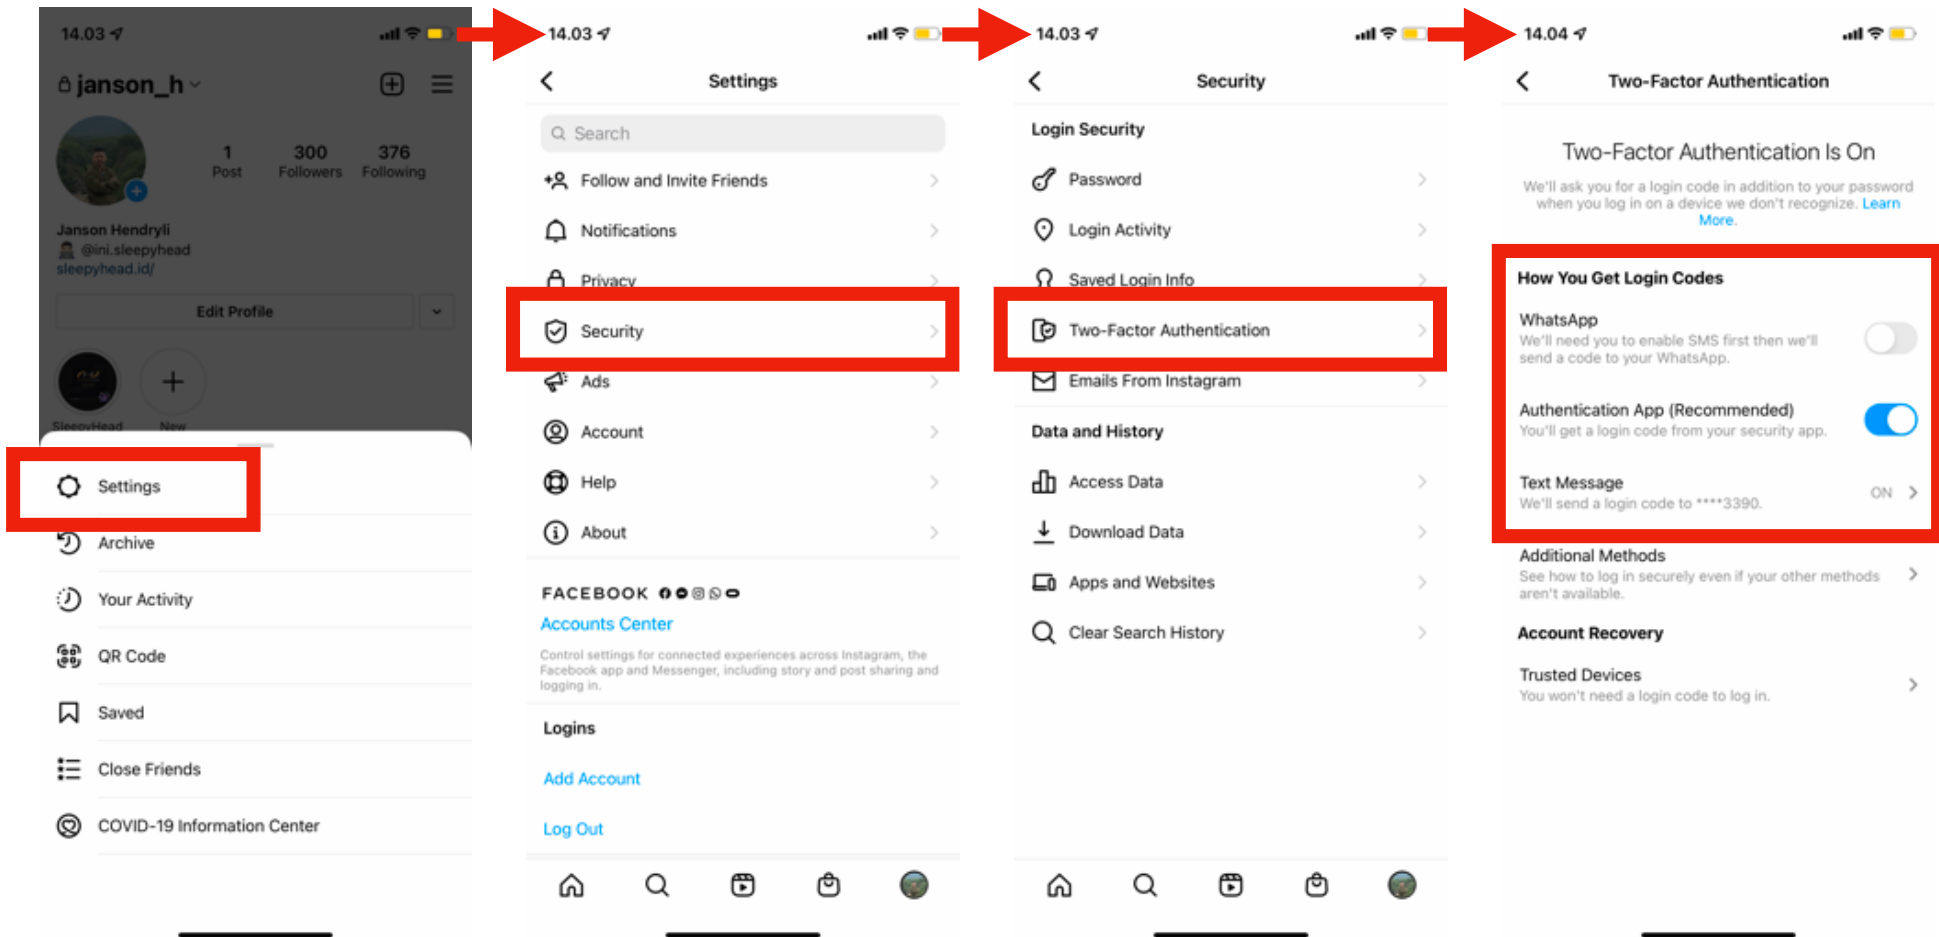

Please Note: These passwords are for demonstration purposes ONLY and are not to be used.

# Password Manager

- ▶ 1Password
- ▶ LastPass
- ▶ NordPass
- ▶ Dashlane

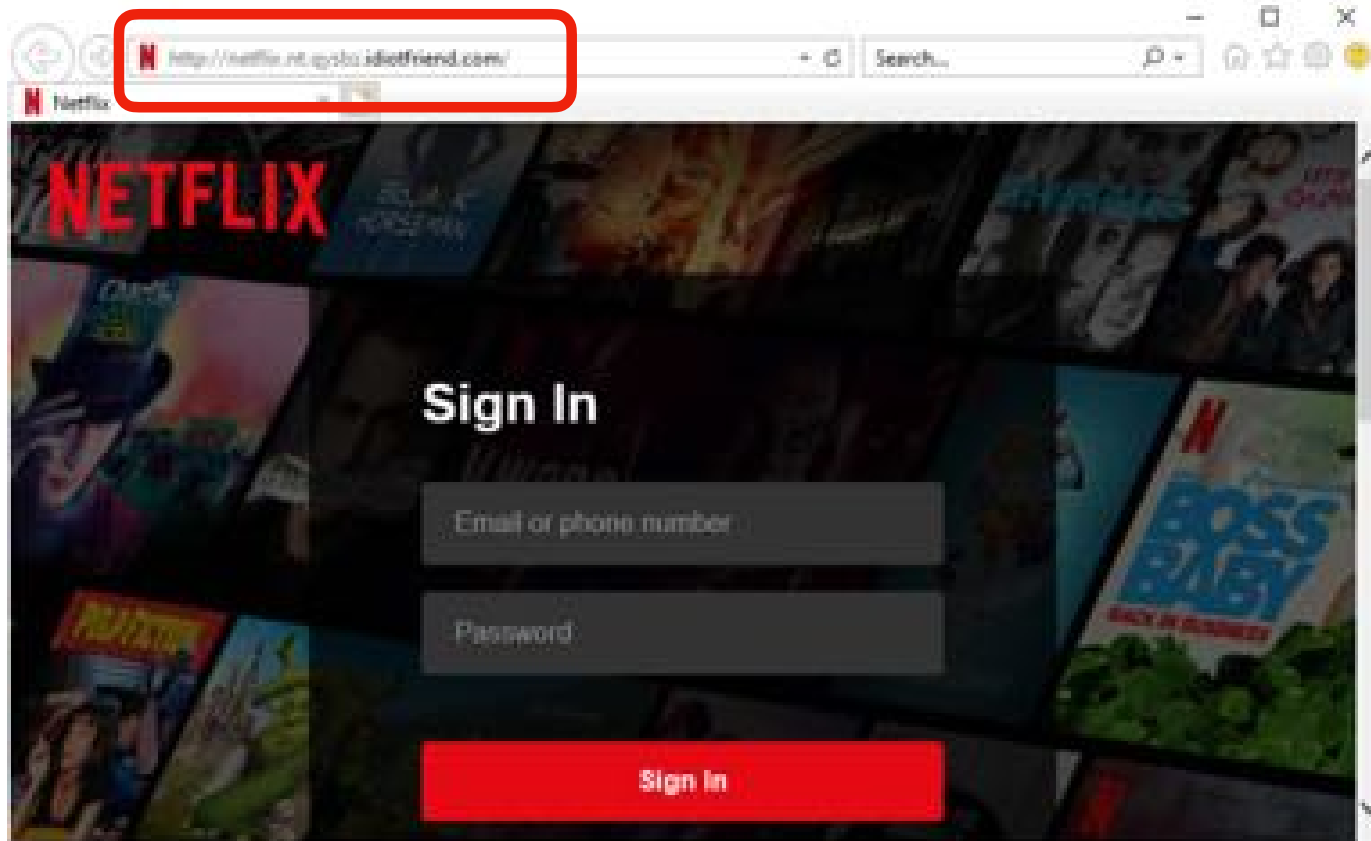

# Aktifkan two-factor authentication (2FA)

# Phising

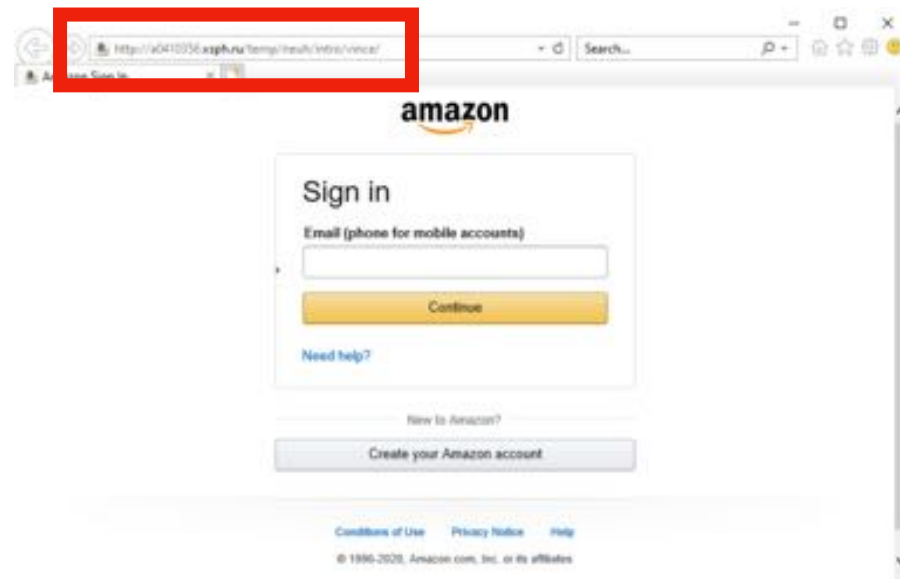

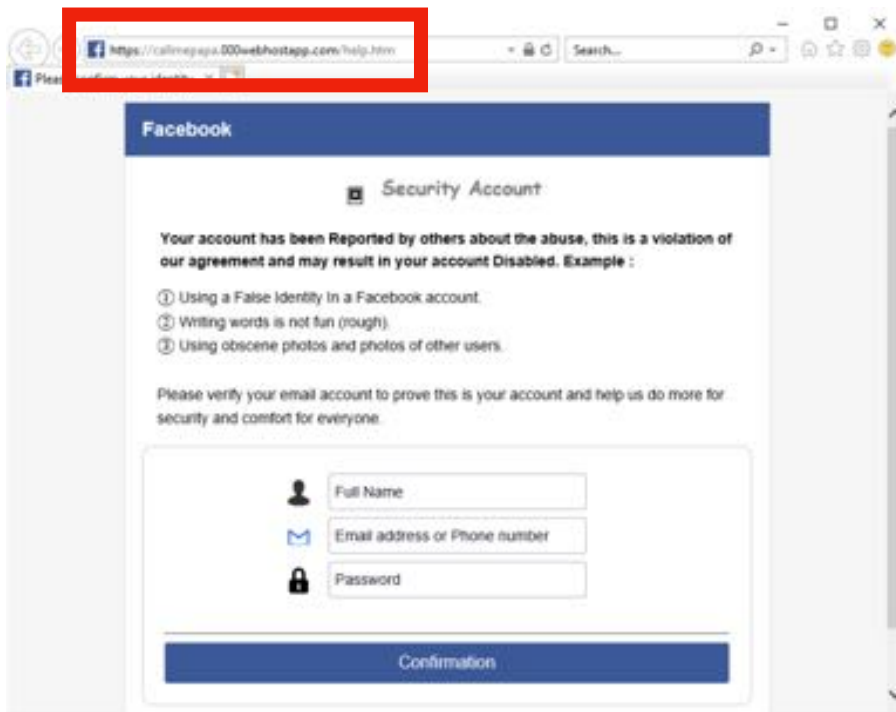

# Cara menghindari phishing scams

- ▶ Jangan sembarangan login
- ▶ Jangan sembarangan klik link atau buka file yang diberikan orang
- ▶ Jangan mengakses data sensitif melalui wifi atau komputer publik

# Cara menghindari phishing scams

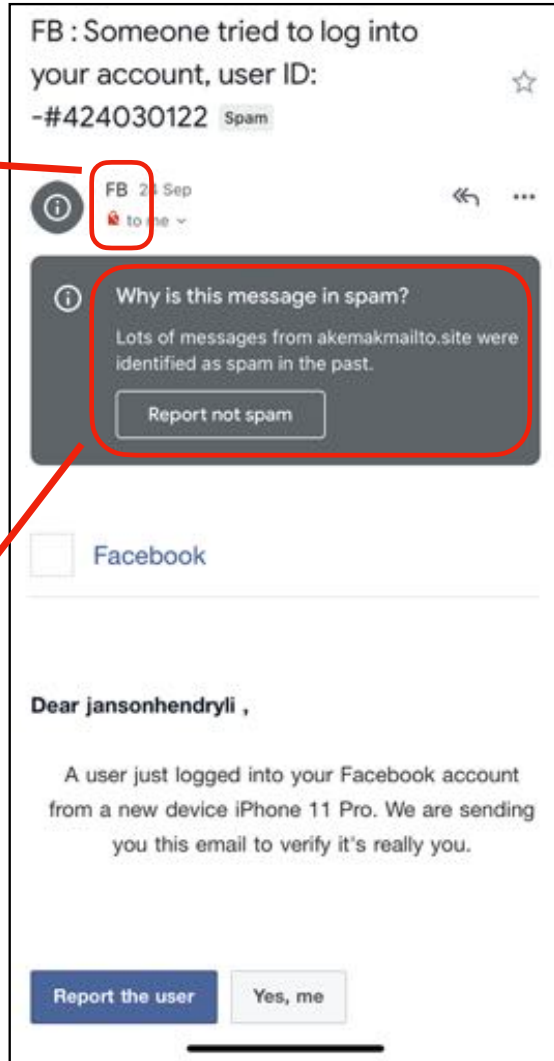

- ▶ Jangan sembarangan login
  - ▶ Fake website (cek alamat website tersebut)

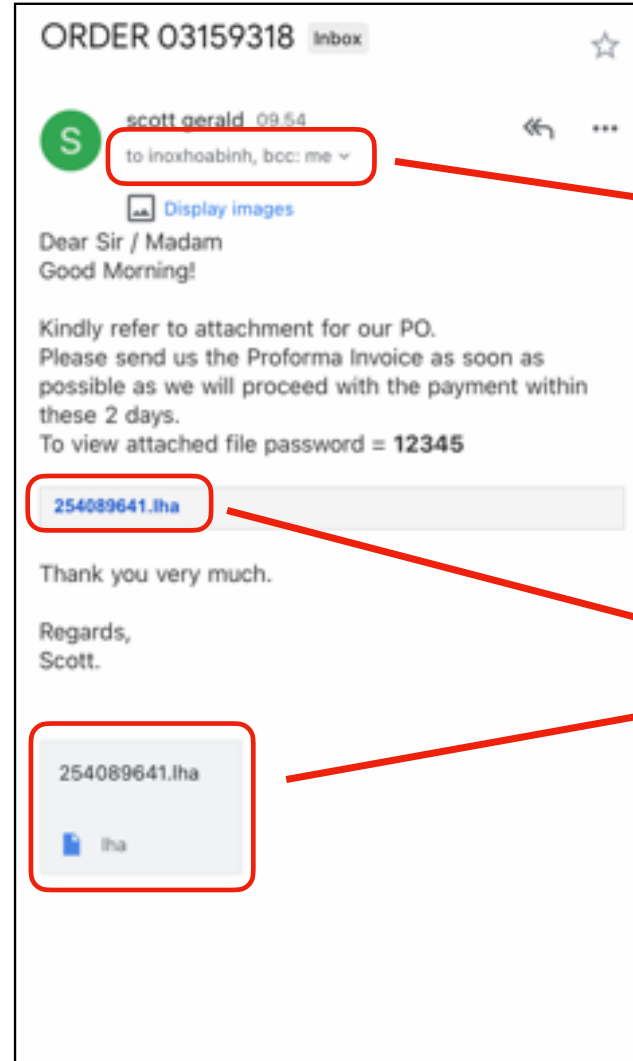

**Cukup berbahaya karena mencoba menyamar sebagai email yang legitimate**

**Tidak dianggap spam oleh Gmail**

Nama pengirim aneh  
Tidak terenkripsi

Dianggap spam oleh Gmail

Tidak dikirim langsung ke email saya (pakai bcc)

Jenis file tidak dikenal  
Umumnya: PDF, Doc, Docx

Gunakan common sense  
Tidak merasa request PO dari LN  
Aneh jika PO memiliki password  
Tidak kenal dengan scott gerald

► **Jangan sembarangan klik link atau buka file yang diberikan orang**

# Jangan mengakses data sensitif melalui wifi atau komputer publik

- ▶ Jangan mengakses data sensitif, misalnya internet banking, email pribadi, dll
- ▶ Lebih baik menggunakan paket data/personal hotspot
- ▶ Gunakan VPN
- ▶ Nyalakan 2FA
